To Whom It May Concern:

Our 20 physician otolaryngology practice has recently had the privilege to work with Geneva Management, L.L.C. in an effort to improve the use of technology in our multiple location, busy ENT practice in South Florida.

The flexibility of the solution allows each physician to adopt the technology at his or her own pace. This is an easy first step towards adopting an EMR in the future. In fact, once we implement an EMR, the benefits of Laserfiche will continue to complement and enhance the usability of the chosen EMR. We believe that the Laserfiche solution will be an additional selling point when recruiting new physicians to our practice.

The fact that Diana Scherber has experience as an otolaryngology administrator made all the difference in the implementation and utilization of the product Laserfiche. Her knowledge of the day to day operations in an ENT practice, using this application, allowed us to skip many of the bumps and move on to a very productive, efficient use of this new technology. She walked us through every step of the project and was able to counsel us in every process decision.

We know that this product and the services provided by Geneva Management, L.L.C. will improve our quality of life, not only for the physicians and staff, but for the patients as well. It was a win-win opportunity and we are thrilled with the outcome. I strongly recommend that as you consider such an important decision in your practice, you work with someone who understands our industry and has used the product for many years.

Feel free to contact me directly at (561) 391-7932 or tsblum@entsf.com.

Sincerely,

Todd Blum, MHA, MBA
Chief Executive Officer
